

## ABOUT US

Mazia EVP™ is a majority black-owned BEE level 1 contributor and managed business entity that build custom software & provides solutions that connect and interact with your data systems to improve productivity and leverage opportunities to create value-added services for your employees

Our experience with over 20 years with Accounting, Payroll & Human Resources software & services for medium and large enterprises forms the foundation for us to work using best of breed tools. We specialize in the customization, design, optimization of processes and delivery of business solutions and services. Mazia EVP™ services are provided by skilled, certified and experienced software professionals.

## OUR SOLUTIONS

### Our Balanced Score-card Framework Focuses On:

---

- Designing and implementing the best type of software and accounting processes and systems to improve customer acquisition, maintenance and growth
- Optimizing and improving internal business processes by using technology and people skills.
- Designing, delivering and automating reports to measure key performance
- Providing accredited consultants staff to train your internal employees.

# Connect People To Software

## OUR OFFERING

We develop and integrate custom mobile apps to replace your printed forms, exponentially improving the time it takes your employees to capture data.

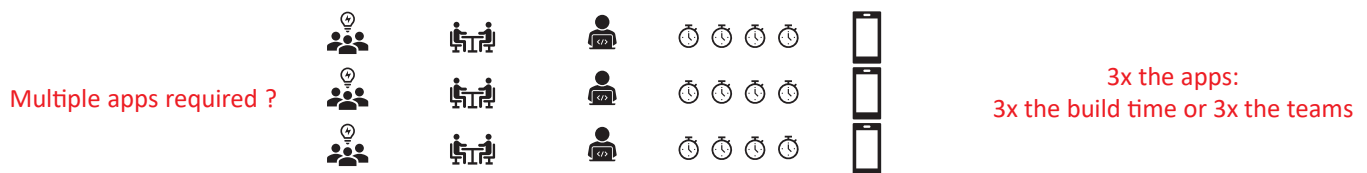

Mazia EVP is structured according to various business units that complement each other however, function independently. This allows us to create strong partnerships with our vendors, but also have the flexibility to provide a cost-effective solution for the end-user client.

Software Intergrations to Business Systems  
Conversion of Manual to Mobile Driven Forms  
Departmental Reporting Software to increase productivity

# COMPARING TRANSFORM WITH CUSTOM DEVELOPMENT

Standard mobile development					
Customer idea 	Design 	Expert dev team 	<ul style="list-style-type: none"> <li>• UI</li> <li>• Business logic</li> <li>• Mobile features</li> <li>• Offline</li> <li>• Local storage</li> <li>• Authentication</li> <li>• Database connection(s)</li> <li>• Link(s) to backend</li> </ul>	Build/Test/Publish/Debug  Weeks / Months to build Hours / Days to update	Delivered mobile app  (with risk of delay/failure)

Low/no code mobile development using Alpha TransForm					
Customer idea 	Design 	Pre-built, data-driven mobile app 	<ul style="list-style-type: none"> <li>• Configure form data fields</li> <li>• Design form layout</li> <li>• Add custom workflows</li> </ul>	Configure/Publish  Hours to build Minutes to update	Delivered mobile app  No risk (testable instantly)

Multiple apps required ?  It is the same app !

# SHARED ENTERPRISE HOSTING

Our Shared Enterprise Hosting service is designed to offer cutting-edge hosting infrastructure, providing clients with high-performance servers, secure data management, and seamless access to critical business applications.

Our hosting solutions are optimized for reliability, ensuring uptime and performance that businesses can depend on, regardless of their size. We maintain strict security protocols, ensuring that all hosted environments are protected against cyber threats and data breaches. Our platform supports integrations with various enterprise resource planning (ERP) systems, making it an ideal choice for businesses seeking to streamline operations and manage resources effectively.

Key features of our Shared Enterprise Hosting services include:

- High-performance infrastructure
- Advanced security protocols
- Scalability to meet growing business demands
- Integration support with ERP systems and third-party applications
- 24/7 monitoring and technical support

Hosted Applications:

Web & Application Software

Facilities System

VPN ,Firewall & Managed Detection  
& Response Hardware Rental.

Supplier & Person Verification.

Pastel & Evolution API

Xero API

## DATA CLEANUP & VETTING

This ensures that your transition to our platform is smooth, reduces onboarding costs, and eliminates data inconsistencies. Our specialized team handles:

- Data capturing to ensure accurate input of information during the migration process.
- Vetting of existing data to identify discrepancies, outdated records, and duplicates.
- Data cleanup to maintain integrity, ensuring that only relevant and verified information is migrated.

By streamlining the migration process, we reduce costs associated with onboarding and prevent future operational inefficiencies due to poor data quality

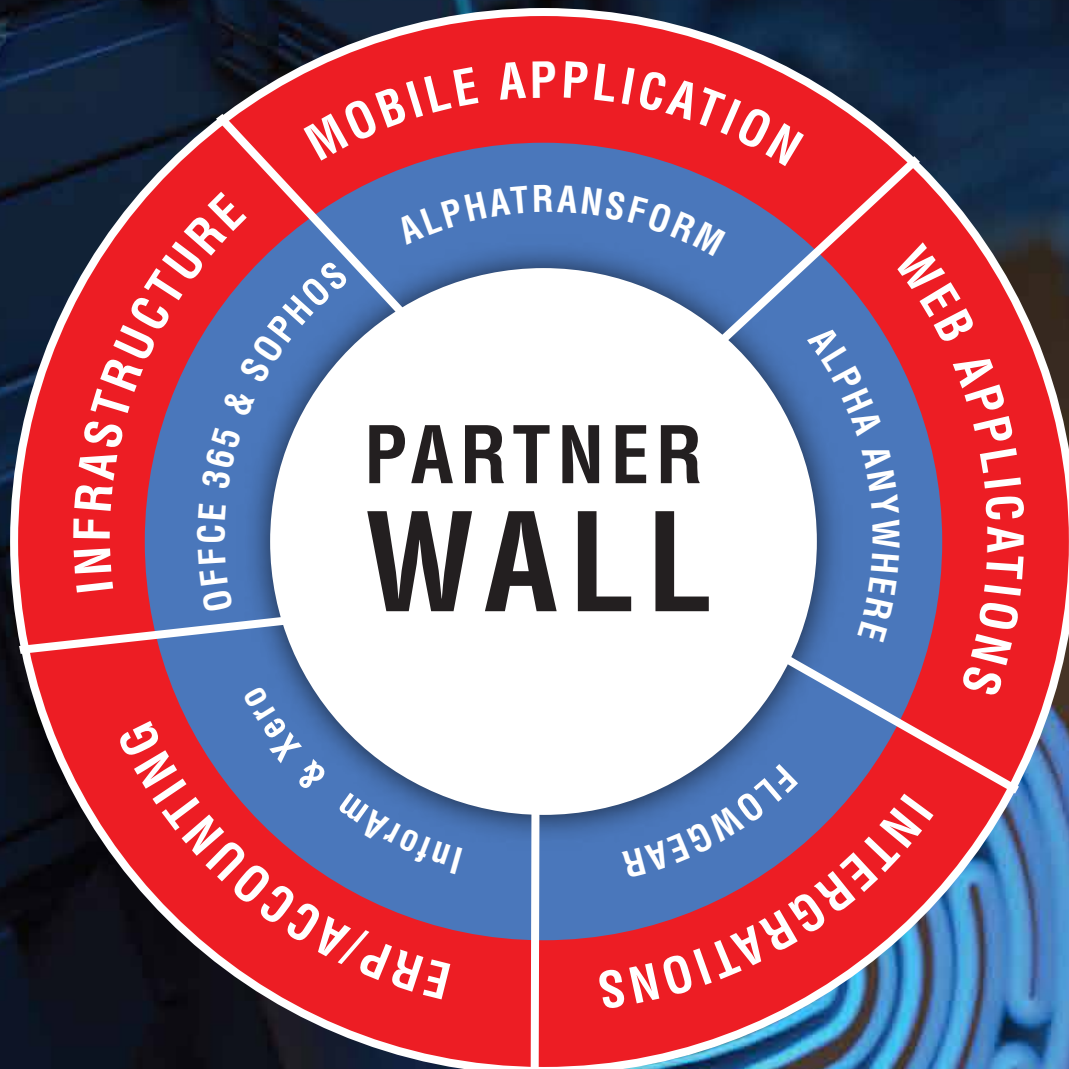

## TRAINING SERVICES

To ensure that your team can fully leverage the capabilities of our enterprise solutions. Our training programs are designed to empower organizations by equipping their staff with the skills and knowledge necessary to utilize our shared hosting environments and enterprise tools effectively. Whether it's onboarding new staff or upskilling your existing workforce, our training is tailored to meet the specific needs of your organization.

Our comprehensive training includes:

- System administration and management
- Security best practices
- Data management and backup procedures
- Application integration and optimization
- Troubleshooting and support processes
- End User Training: We provide practical training for end users, ensuring they can efficiently interact with hosted applications, understand user interfaces, and follow best practices for daily operations.
